Topic

Avoiding Catastrophe: Changing our Modes of Thinking

Shortly after nuclear weapons were first invented, Albert Einstein stated: "The unleashed power of the atom has changed everything save our modes of thinking and we thus drift toward unparalleled catastrophe."

The contest, held on YouTube, seeks 2-3 minute videos from people of all ages and countries addressing these questions:

1. In what ways does humanity have to change its "modes of thinking" in order to survive and come together?
2. How can we avert the catastrophe that Einstein foresaw?

Entries due by 5pm Pacific Time on April 1st, 2010
